Introduction

This diploma project is to develop an online platform for advanced training based on the terms of reference of the Public Association of Persons with Disabilities "Elorda Adilet Ortalygy".

Through this platform, the "Elorda Adilet Ortalygy" will further realize staff training.

Literature Review

In recent years, there has been an increase in interest in the idea of offering advanced instruction on an online platform. Organizations are understanding the necessity of offering staff chances for advanced training as they work to stay up with the rapidly evolving technological environment. This literature review's investigation of "online platforms for advanced training" aims to identify market trends, obstacles to growth, and untapped prospects.

ERIC

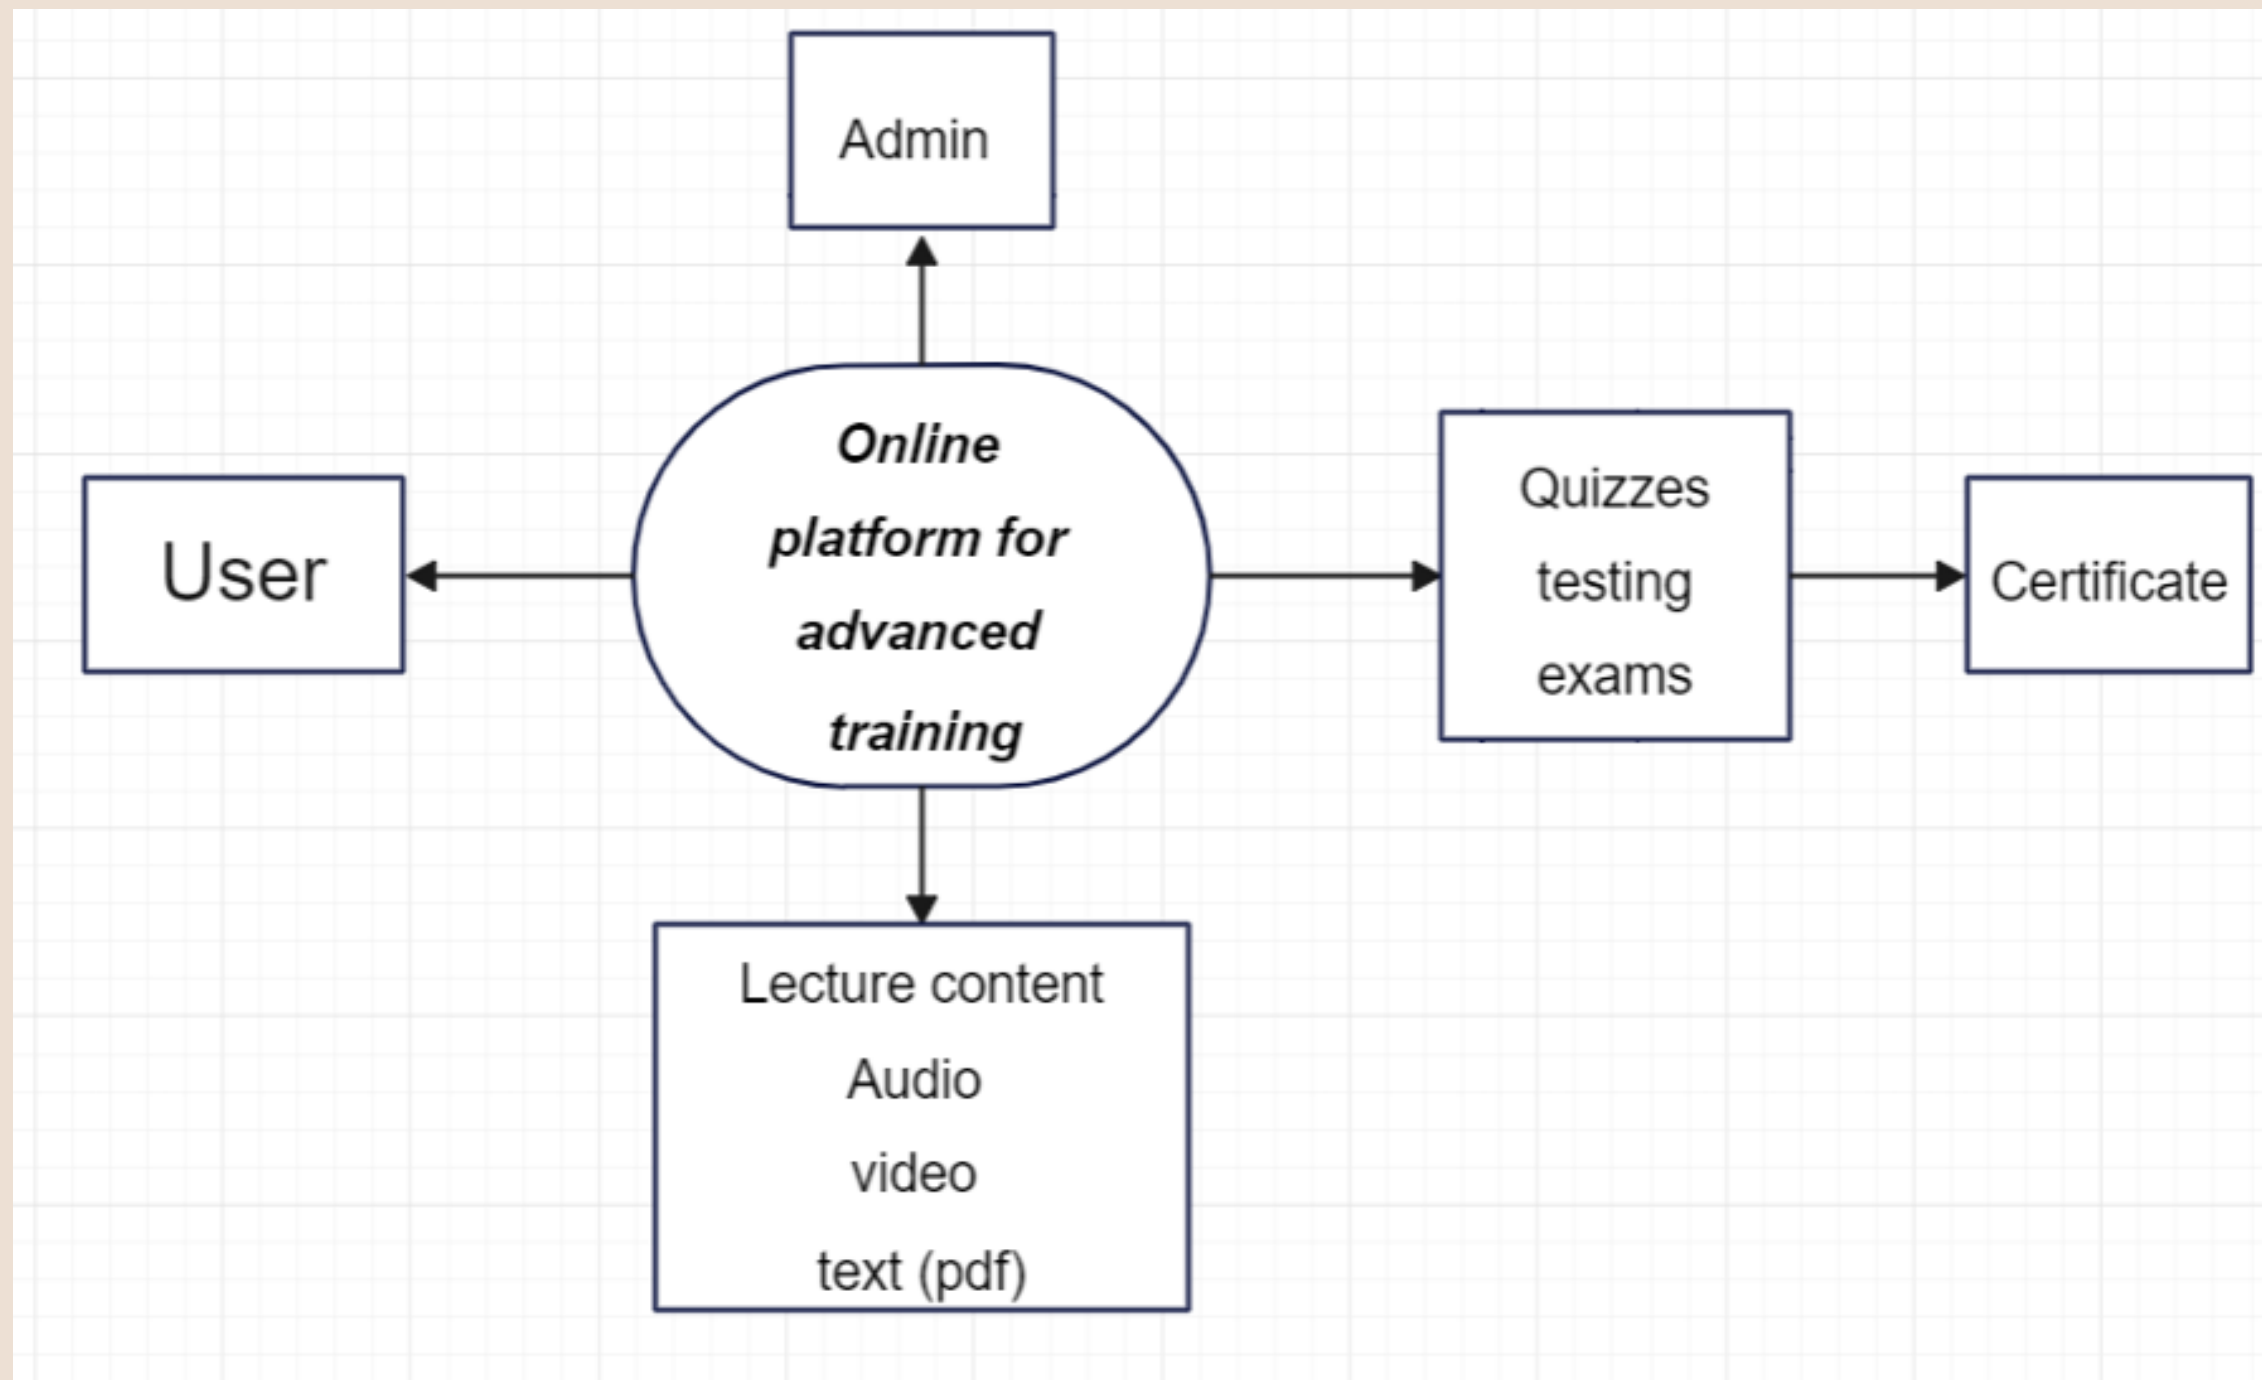

Analysis of existing systems

- An Online Platform for Engaged Learning, by Kriz, Tiffany D., examined how training in basic IT knowledge and skills may be facilitated through the use of an online platform.
- **Acadly** is an online resource and mobile app that offers features including monitoring participation, in-page discussion threads, and automatic attendance.
- Many online platforms also provide flexible scheduling choices, enabling students to fit their courses into their hectic schedules

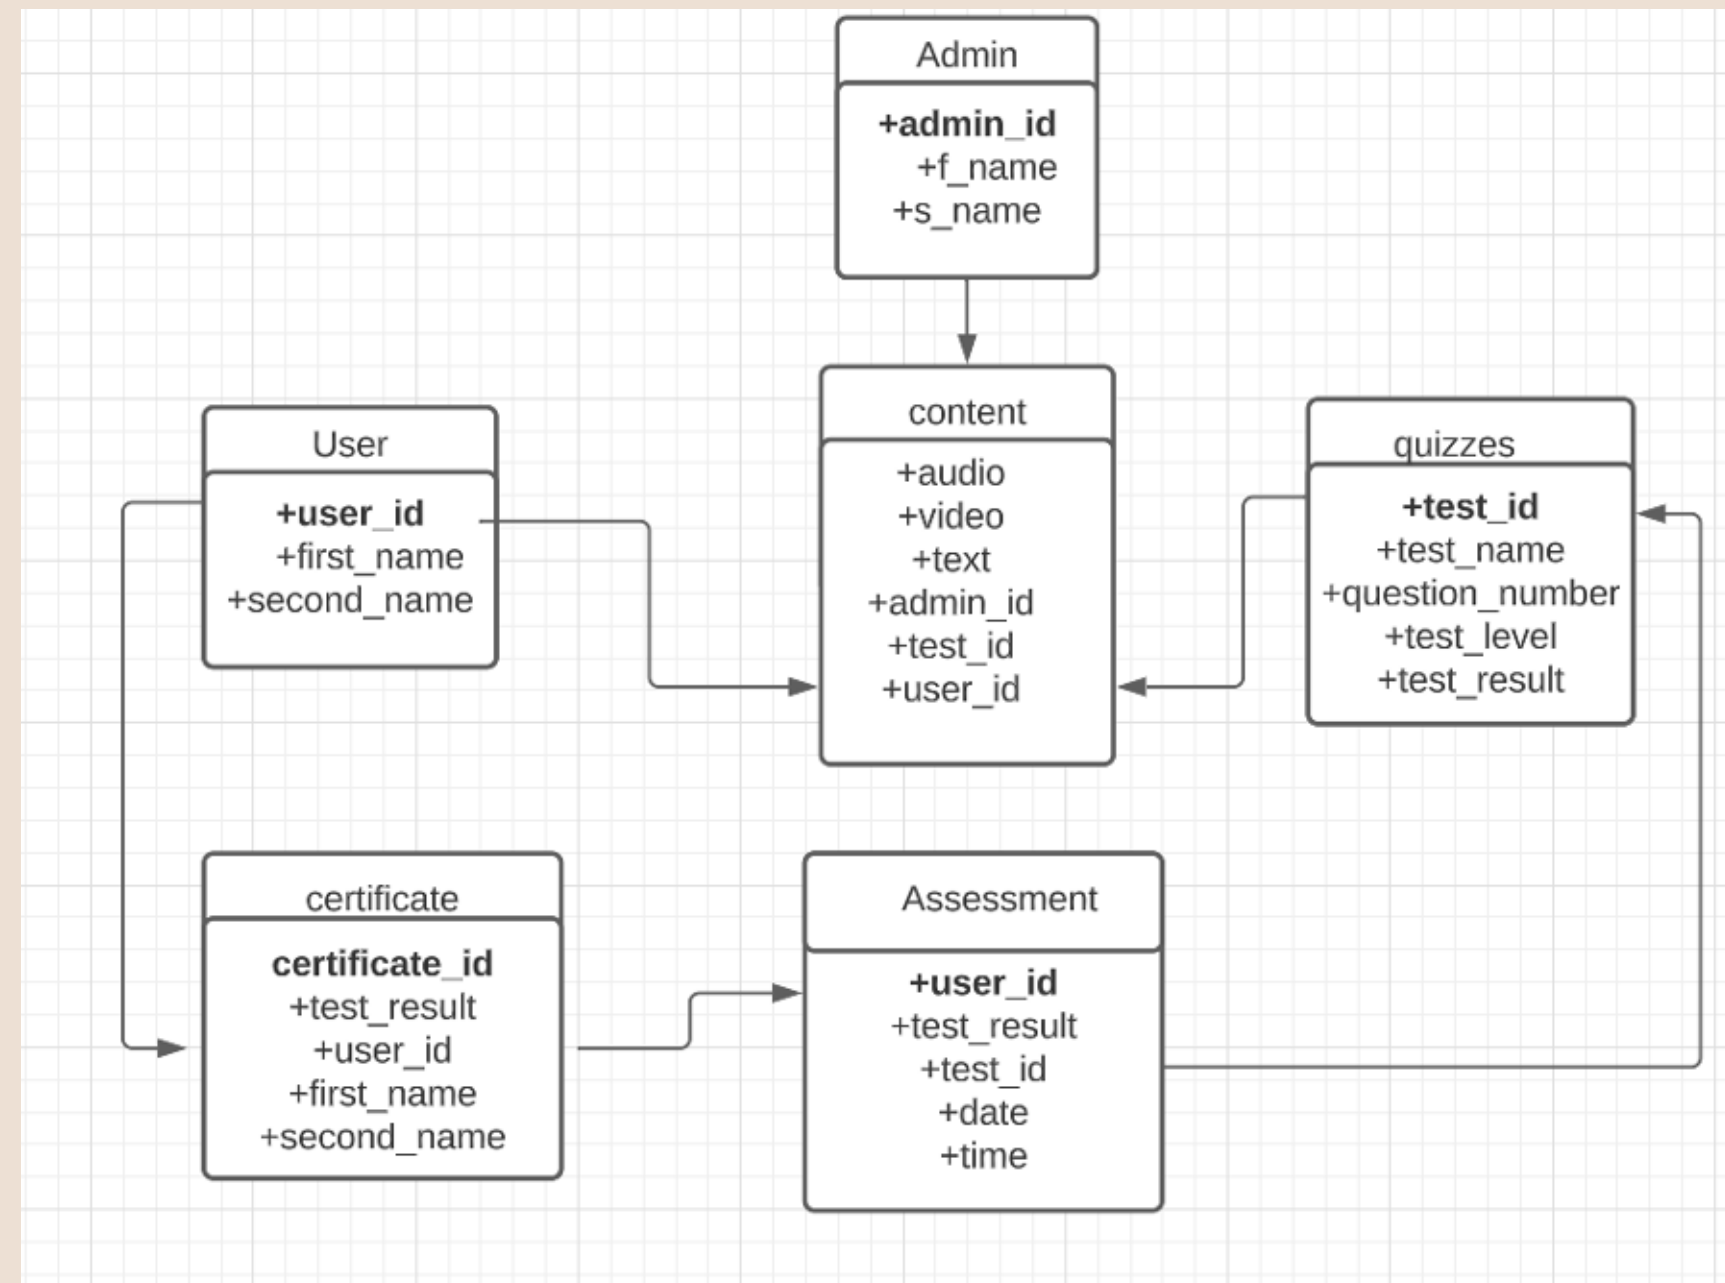

Methodology of the work

- Interview with director of "Elorda Adilet Ortalygy"
Alisher Ibraev.
- Technical tasks of client-organization
- Qualitative method (what, when, how)
- Tools. (django, react)

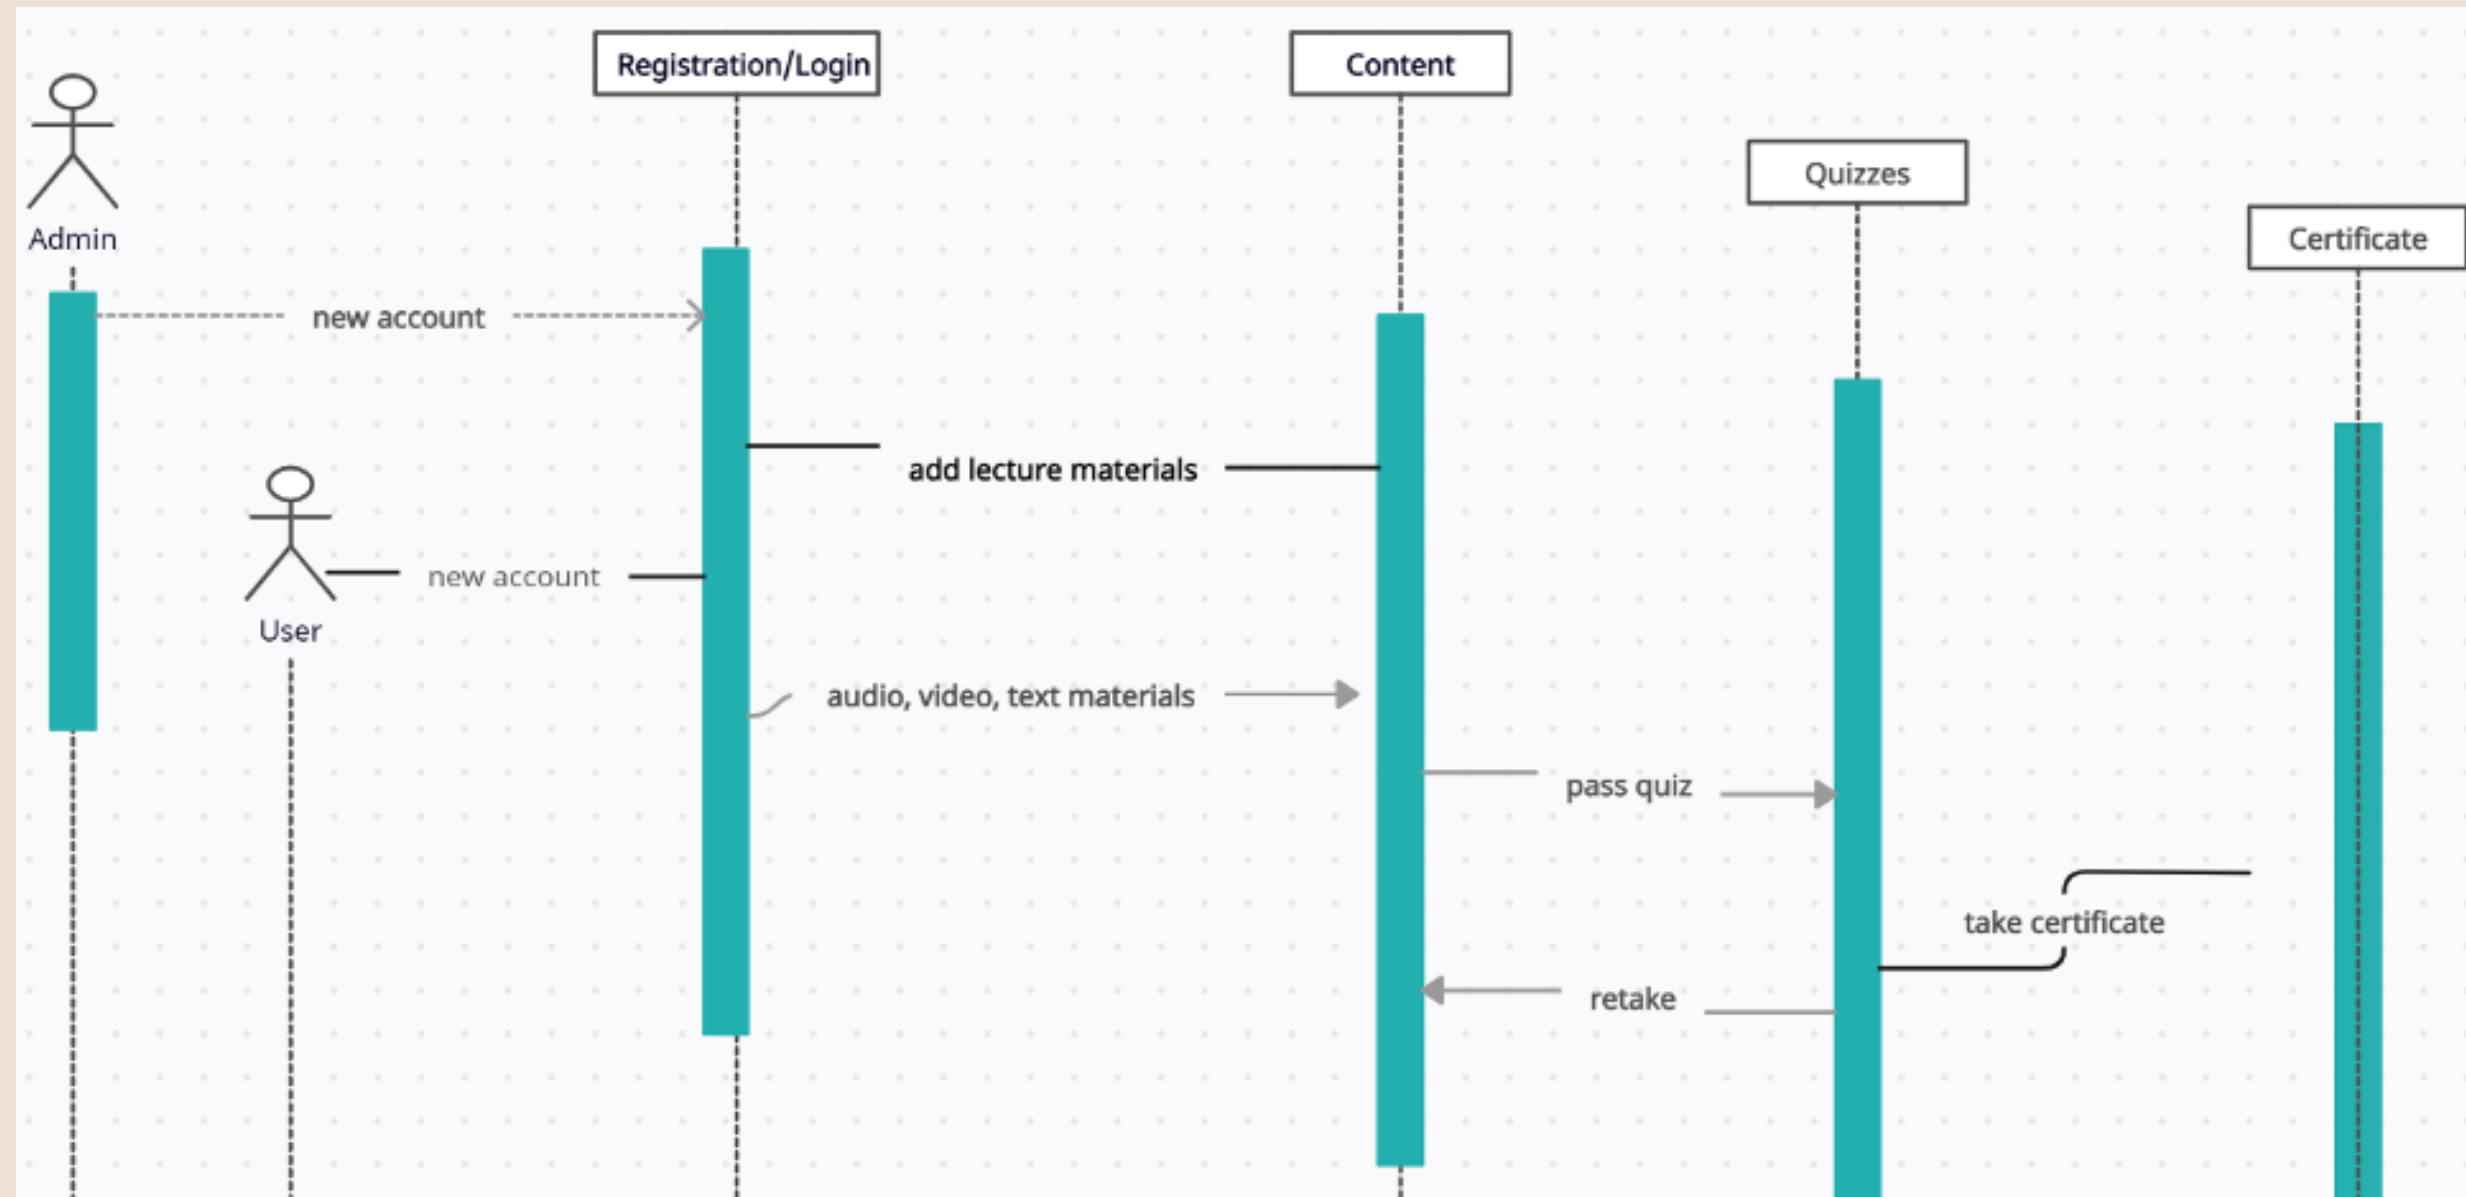

Analytical Framework

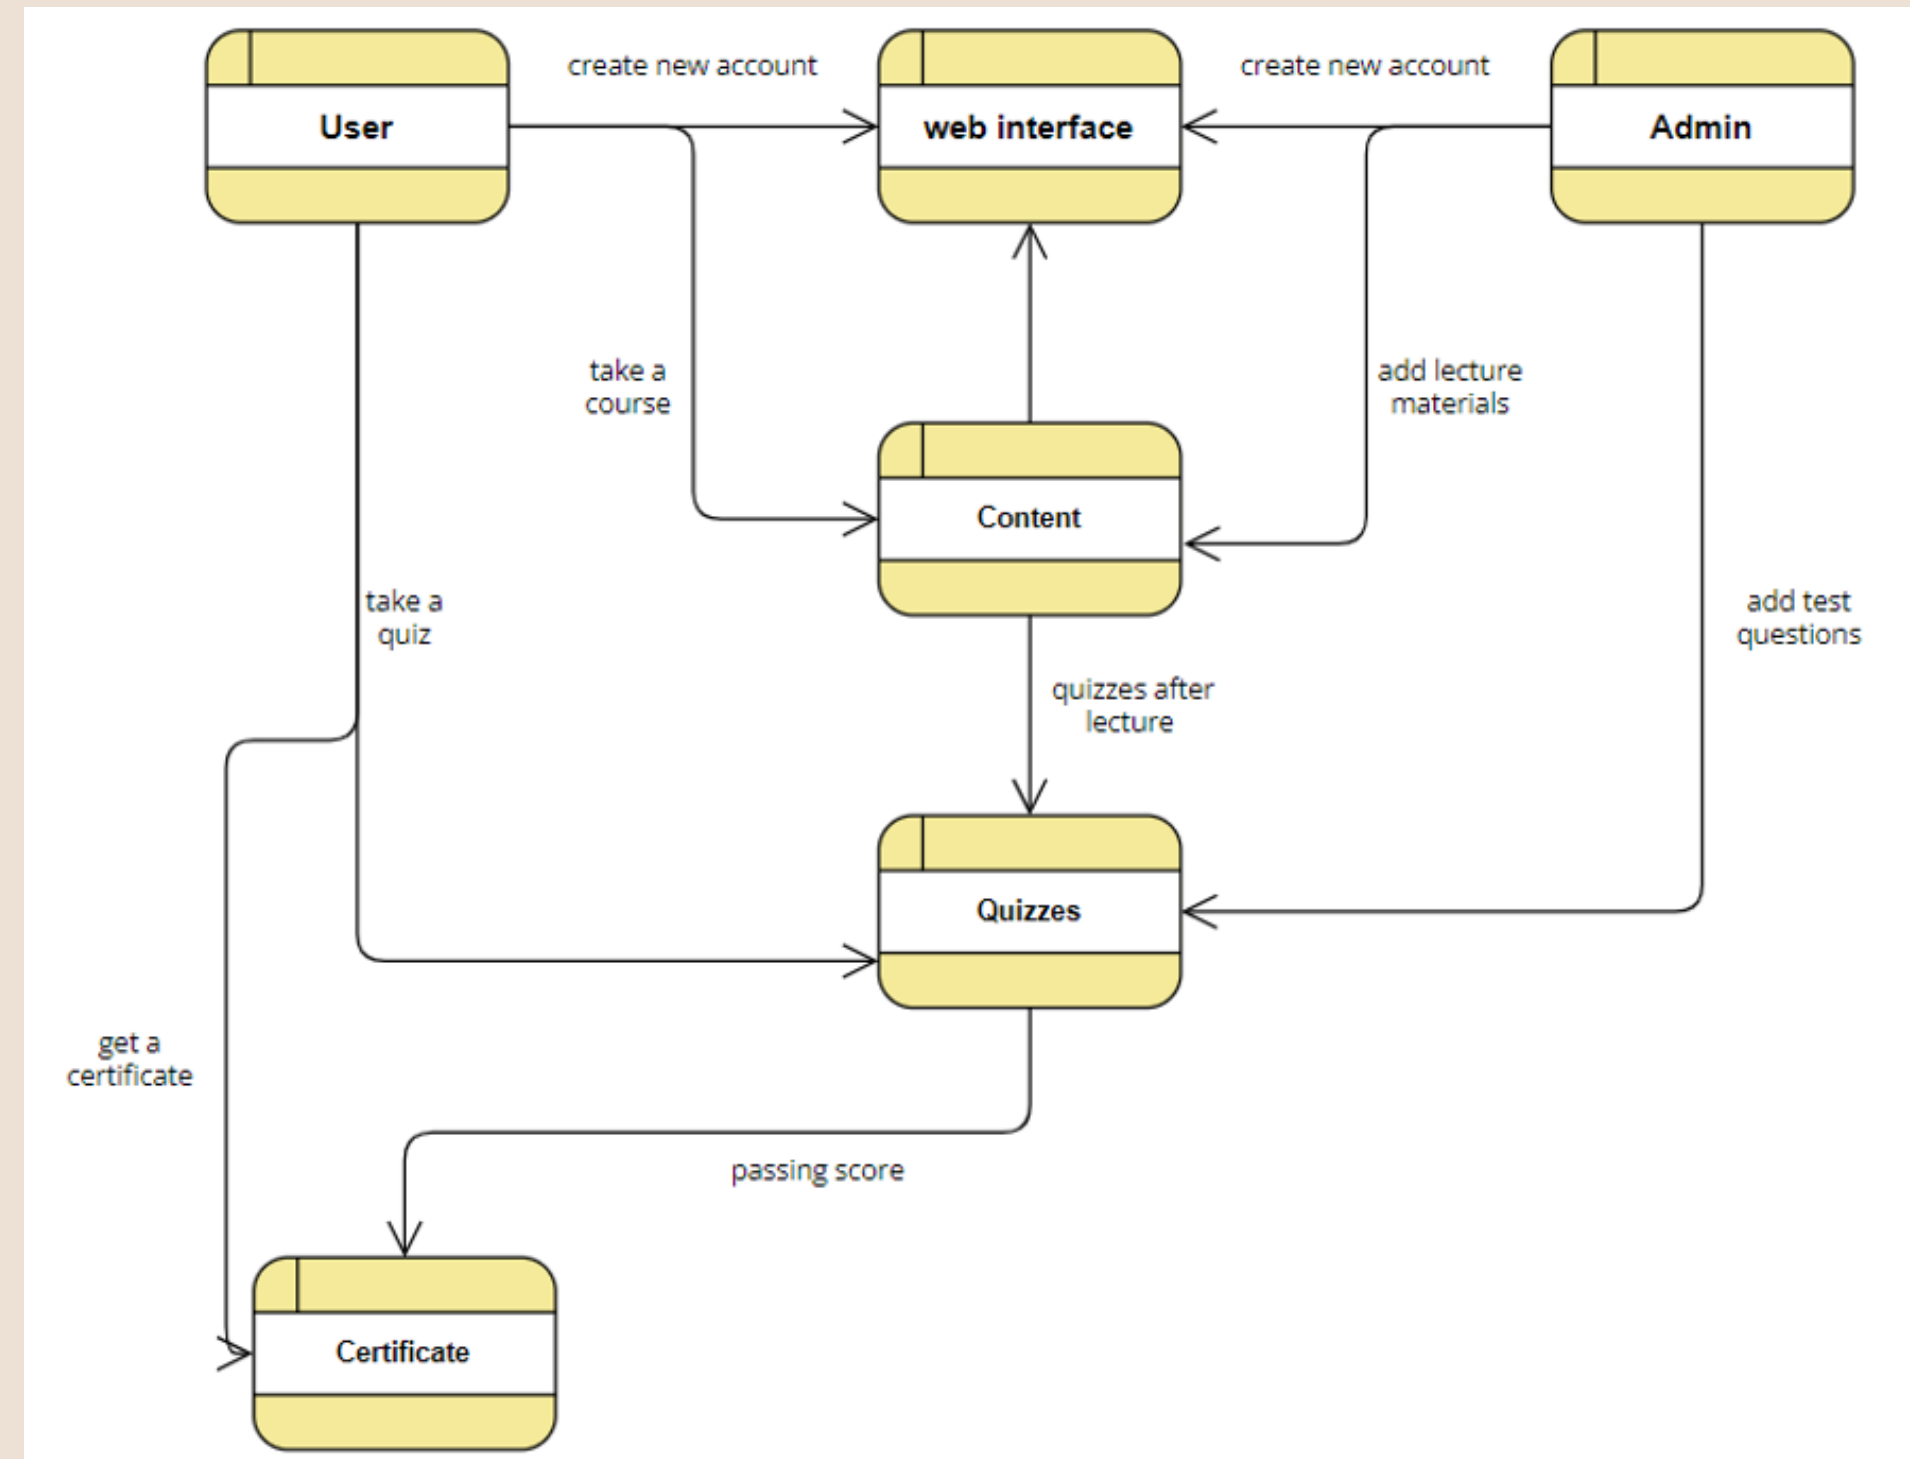

Entity-relationship diagram

Sequence diagram

Data flow diagram

Technology comparison

Technology comparison is an important step in the development process, as it helps to ensure that the chosen technology solution is appropriate for the needs of the project and can deliver the desired results.
